WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/KR2004/000962

| Box No. I Basis of this opinion |
|--|
| |
| 1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item. |
| This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)). |
| With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: |
| a. type of material |
| a sequence listing |
| table(s) related to the sequence listing |
| b. format of material |
| in wirtten format |
| in computer readable form |
| c. time of filing/furnishing |
| contained in the international application as filed. |
| filed together with the international application in computer readable form. |
| furnished subsequently to this Authority for the purposes of search. |
| 3. In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished. |
| 4. Additional comments: |

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/KR2004/000962

| Box No. V | Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; |
|-----------|---|
| | citations and explanations supporting such statement |

| Statement | | |
|-------------------------------|----------|-----|
| Novelty (N) | Claims 1 | YES |
| | Claims | NO |
| Inventive step (IS) | Claims 1 | YES |
| | Claims | NO |
| Industrial applicability (IA) | Claims 1 | YES |
| | Claims | NO |

2. Citations and explanations:

The following documents are referred:

D1: KR 2001-60200 A D2: US 6140773 A

- 1. D1 discloses a plasma generating device in which the working electrode is located near the gas inlet, and the ground electrodes near the emission hole.
- D2 discloses a plasma source array in which several sources are mounted in parallel. Accordingly, the subject-matter of Claims 1-4 is considered to be novel (Article 33(2) PCT).
- 2. The closest state of the art appears to be represented by D1. Regarding the independent Claim 1, the technical concept advanced over D1 is the multiple dielectric walls. Said walls separate the cavity into several channels, and make it possible for the gas to flow through said channels. Neither D1 nor D2 suggests those such channels for gas flow. Thus, Claim 1 involves an inventive step and meets the requirement of Article 33(3) PCT.
- 3. The industrial applicability of said subject-matters is self evident.
